

Hello (soon to be!) year 7 students,

Here are some activities that you can work on over the summer holidays, which will keep your brain active and ready for September.

Just like 5-a-day fruit/vegetables keeps your body healthy, 5-a-day maths keeps your brain healthy too!

There are four levels of difficulty:

- Bronze (easiest)
- Silver
- Gold
- Platinum (hardest)

You can choose whichever level you want to do.

Answers are also included so you can check your understanding. Do not peek too soon however!

See you in September
